

Prof. Artem PAVLYCHENKO,
First Vice-Rector, Professor of Department of Ecology and Technologies of Environmental Protection

Pavlo LOMAZOV, PhD
Associate Professor of Department of Ecology and Technologies of Environmental Protection

DNIPRO UNIVERSITY OF TECHNOLOGY

Dnipro University of Technology combines a long academic tradition with a modern mission: educating highly qualified professionals, supporting the sustainable development of industry and communities, and fostering responsible and resilient citizens. Evolving from a Higher Mining School into a modern university of technology, DUT continues to build on its strong educational and scientific traditions while responding to today's environmental, technological and societal challenges.

WE OFFER

- Expert support to regional manufacturing enterprises, high-tech businesses and territorial communities
- Active participation in the implementation of barrier-free programs
- Mental health support
- Involvement of young students in competitions and projects in the field of sustainable development
- Preparation of regional target programs and projects for grant funding

WE ARE LOOKING FOR

- Partners in implementation of projects in environmental protection, sustainable development, circular economy and other directions connected with fields
- Development and implementation of joint education, scientific and social initiatives in the sphere of raising awareness of different group of population (students, teachers, citizens, authorities) about sustainable development, rational nature management, resilience and sustainability
- Long-term and short-term trainings / courses / educational programs and projects about circular technologies in different branches of industry
- Internal and external academic and scientific mobility for sharing best practices for using environmental protection technologies in different countries in different contexts and legislative regulation
- Remote access to laboratory equipment to innovative technologies in the field of circular usage of resources

UNIQUE EXPERTISE & INITIATIVES

Resource Center of Sustainable Development, ECOSAFETY Centre, Energy Saving and Energy Management Centre, Business Incubator	Digital Educational Platforms (Moodle, MS Teams), COILs courses, Jean Monnet projects, Erasmus+ EMINRem Educational platform	Raising awareness of communities on Green Deal and industrial and domestic waste management, alternative energy (solar, wind, biomass etc)	Consulting and support of businesses in different fields in terms of compliance with international environmental legislation (e.g. CRSD)

NETWORKING FOCUSES

We are looking for partnership in joint teaching, student and teaching staff mobility, and sustainability-oriented research and practice initiatives.
